PRODUCT DATA SHEET WB WHITE TOPCOAT CONTINUED

Substrate preparation:

New wood: Remove any dirt, grease, glue, or other contaminants. Moisture content of wood should be 7-9%. New wood: Sand to 150-180 grit. Proper sanding of wood is absolutely critical to achieve the best color development and adhesion of the coating to the substrate.

Old wood: Strip old finishes completely and remove all contaminants from the surface. Make sure the surface is dry, sand as required. Finish as new work.

Mixing Instructions:

Mix material thoroughly before and during use. Material may be mixed by hand or mechanical agitation at moderate speed.

Application:

Apply 2 to 3 coats at a rate of 3 to 5 wet mils per coat. Do not exceed 3 coats for the total system. Sandable and recoat-able after 1 hour at 68 °F. Use Scotch-Brite or 220-320 grit sandpaper between coats. Sanding dust must be removed by blowing off or tack ragging. For best adhesion, sand previous coat immediately before applying topcoat and apply topcoat to the sanded surface within 6-8 hours.

Wet film thickness per coat: 3-5 mils. Dry film thickness per coat: 1-1.6 mils.

Recommended Tip Sizes:

Air Spraying (cup gun)	nozzle Size 0.066 35-45 PSI
Airless	9-13 thousandths 1450-2175 PSI
Air Assisted Airless-	9-13 thousandths Material Pressure 400-600 PSI Assist Air pressure 10-15 PSI

Precautions:

These products are intended for Professional use only. Do not proceed if you are planning on mixing with other finishing systems or other manufacturers' products. Spectrum Paint will not be held liable for finish failures due to the improper use of our products or deviation from our finishing recommendations.

Safety Data Sheets are available from Spectrum Paint. Prior to use of this product, obtain and review the Safety Data Sheet for health and safety information. Read and observe all precautionary notices on container labels.

Equipment:

All equipment used with this product must have plastic, stainless steel, or Teflon fluid passages and wetted parts.

Containers:

All containers used in conjunction with storage and/or application of this product must be stainless steel, plastic, or otherwise water resistant.

Clean Up:

Use water when in a liquid state, clean with an 80/20 blend of water and Butyl Cellosolve when material is semi-dried, and clean with acetone to remove dried coating. Dispose of in accordance with Federal, State, and Local regulation regarding pollution.

Care and cleaning of this finish: Use a mild dishwashing liquid and a damp cloth to remove food, grease, and other residue. Wipe dry. Do not use cleaners that contain ammonia, bleach, or abrasives as this may damage the finish.
